Period for Reply -- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Acknowledgement of Applicant's Amendments

The preliminary amendments made to the claims in the Amendment filed on 2/7/2006 have been received and considered by the Examiner.

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 34-45, drawn to a mold for fabricating a silica-based preform.

Group II, claim(s) 46-61, drawn to a method of fabricating a sintered silica part.

Group III, claim(s) 62-66, drawn to products (i.e. green part and/or sintered silica part) fabricated.

2. The inventions listed as Groups I, II, and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

It is considered that groups I, II, and III have the following common technical features

- i. A mold for molding a silica-based preform, with
- ii. Silica based preform being sintered from a slurry based silica powder and liquid, and
- iii. Forming said preform in the mold with interior and exterior walls of the mold delimiting walls of the preform, with
- iv. An interior portion permeable to the liquid.

3. It is considered that such common technical features are well known in the silica-based preform molding art. For example, it is considered that the instant claimed distinguishing features above are disclosed in Loxley et al. <US 2002/0152768>. Accordingly, since the common technical features are known in the art, it is considered that groups I, II and III all lack corresponding special technical features.
4. A telephone call was made to Mr. Eric Jensen on 2008 March 18 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to DEMARIS R. WILSON whose telephone number is (571)272-6377. The examiner can normally be reached on 9-5 Monday-Friday.
